

PM-WANI USE CASES

THE REVOLUTIONARY PM-WANI

A one of its kind framework that is enabling everyone to get connected:

The banner features a blue background with a hexagonal grid pattern. The grid contains images of a rural village, a market stall, a person using a laptop, and a public Wi-Fi access point. A central figure of a person in a blue uniform holding a laptop is positioned in the middle of the grid. To the right of the grid, the text 'PM-WANI' is prominently displayed in large, bold, black letters, with a Wi-Fi symbol integrated into the 'M'. Above this, the tagline 'Broadband at your fingertips' is written in a smaller font. Below the main title, the full name 'Prime Minister's Wi-Fi Access Network Interface' is written. Further down, a paragraph explains the scheme: 'Individuals in residential area can serve as a **Public Data Office (PDO)** and provide Wi-Fi service. This will create many employment opportunities for people across the country.' On the far right, a portrait of Prime Minister Narendra Modi is shown, wearing his characteristic orange kurta and white shirt.

Remote Connectivity

Low Cost Public WiFi

Broadband at your fingertips

PM-WANI

Prime Minister's Wi-Fi Access Network Interface

Individuals in residential area can serve as a **Public Data Office (PDO)** and provide Wi-Fi service. This will create many employment opportunities for people across the country.

MULTIPLE USE CASES ENABLED BY PM WANI

1

UNIFIED PDO SOLUTION

Providing a unified solution for those who need unlimited home internet by partnering with local players

2

PDOA AS A SERVICE

Offering hardware and software stacks as an offering to PDOAs

3

HOTSPOT CENTRES

Creating multiple hotspots in key public spaces such as railway stations, tourist destinations, hospitals, educational institutions etc.

4

FREE PUBLIC WIFI HOTSPOTS

Enabling free Wi-fi at Railway Stations, café chains etc. across the country

1

UNIFIED PDO SOLUTION

To increase broadband penetration, creation of a unified solution that ensures customers get home internet and PM-WANI compliant routers in one go

WHAT DOES IT SOLVE?

Enhances the goal of **Digital India** by growing Wi-Fi Penetration in India

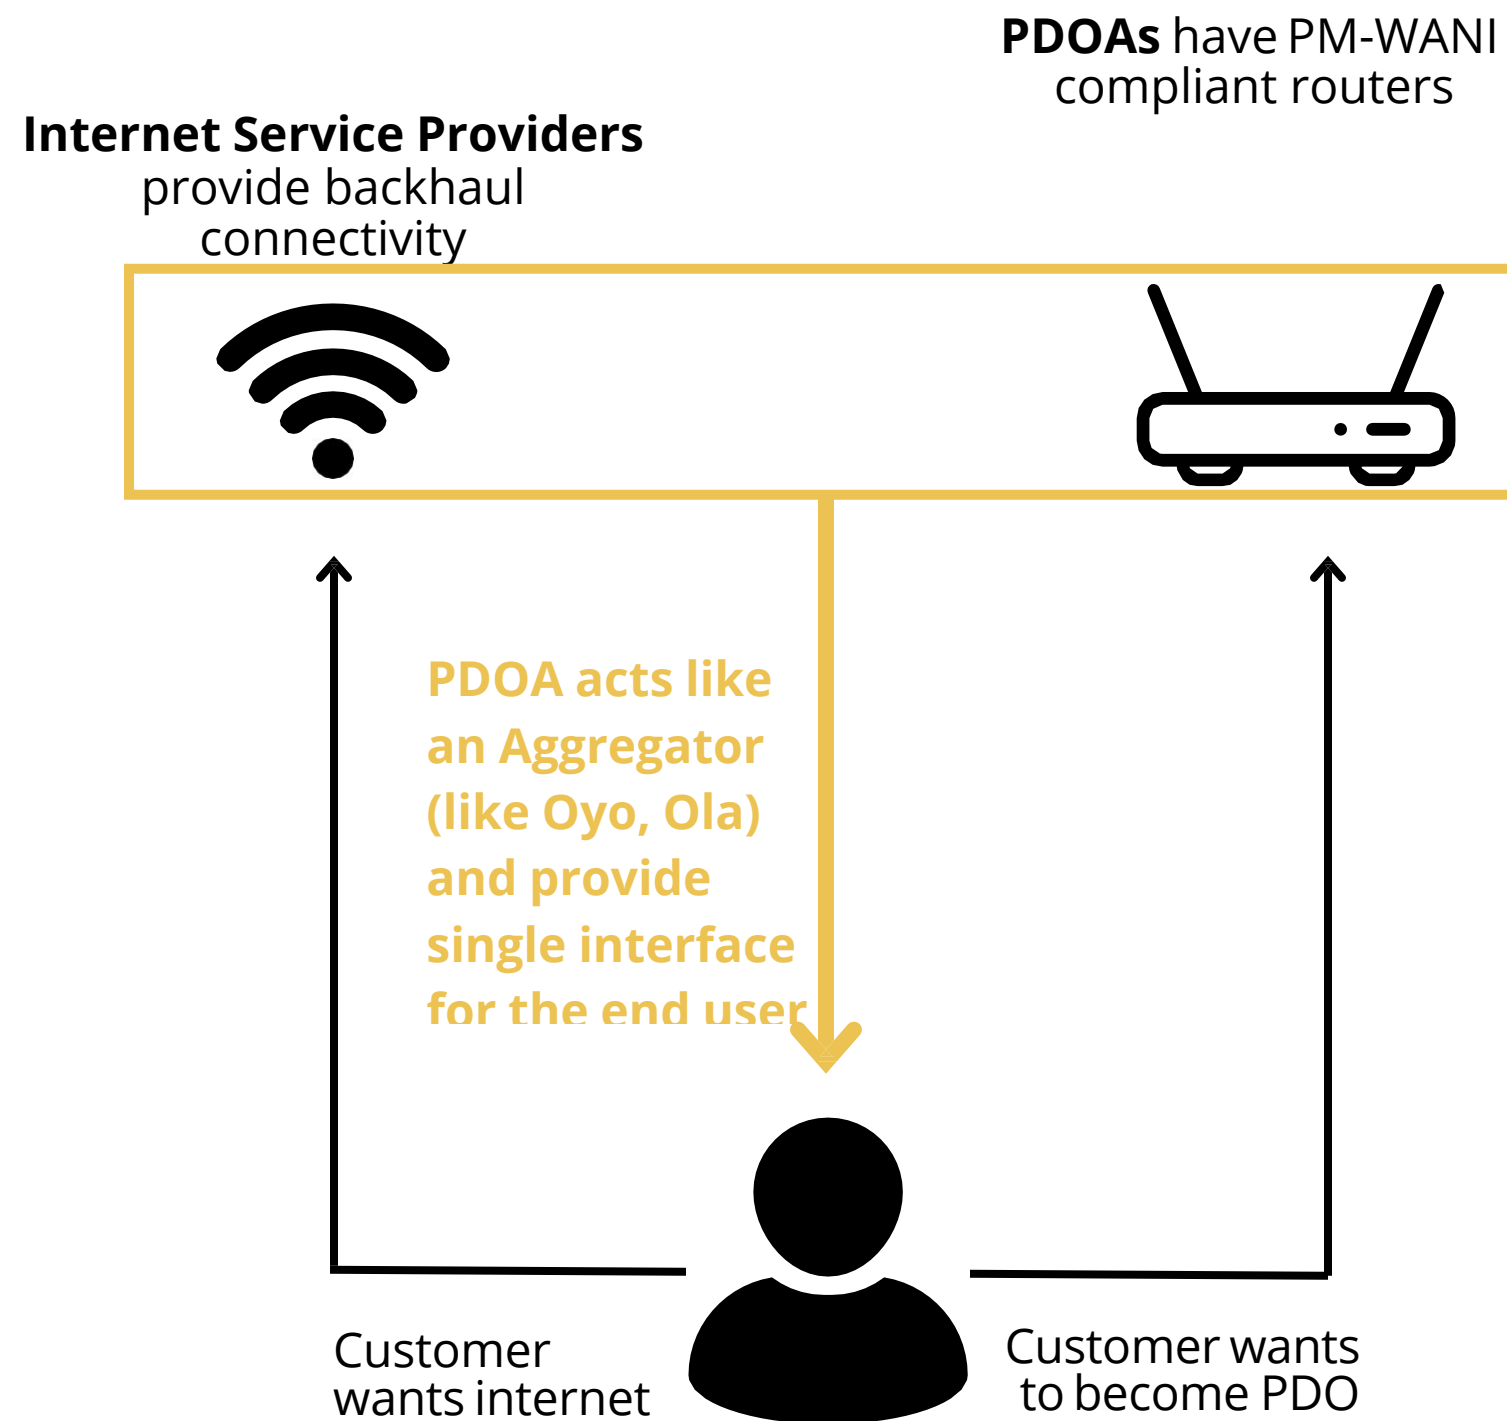

Convenience for the customer as they have a one stop shop to getting unlimited internet and becoming PDO

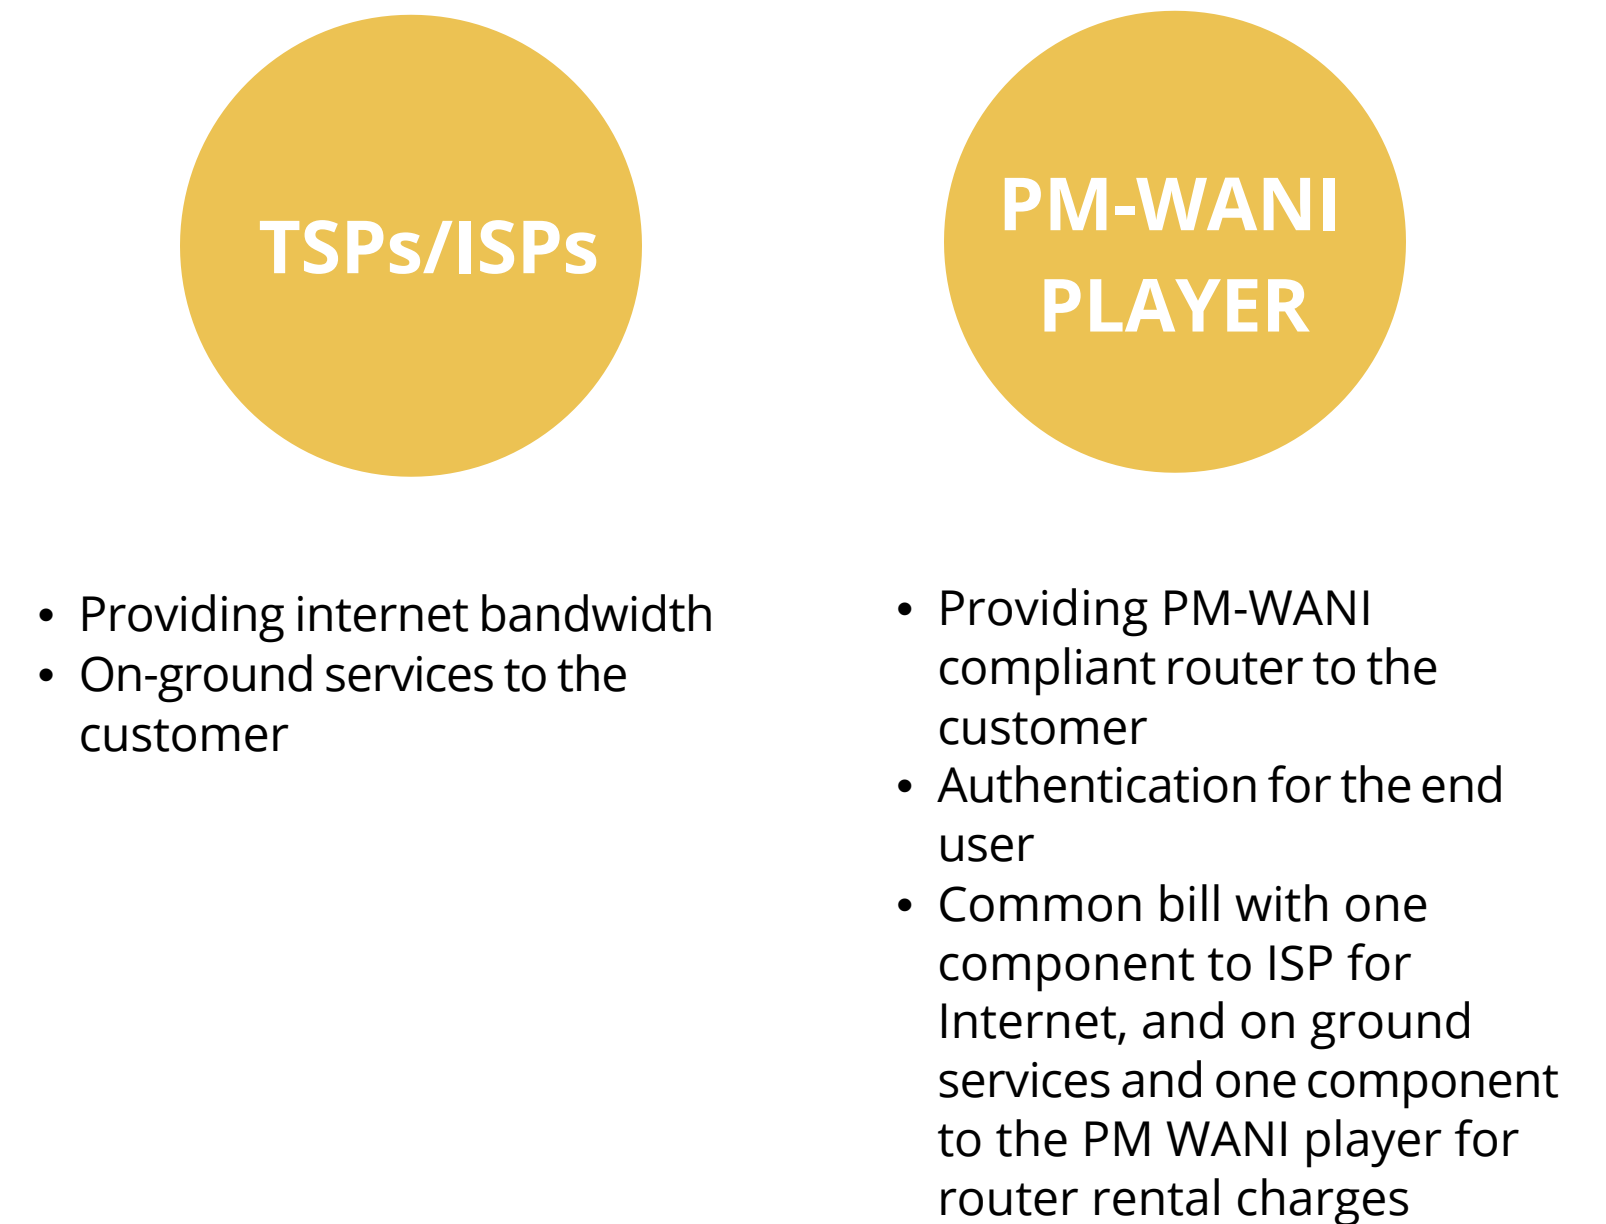

Utilizing the existing infrastructure by promoting local operators for faster proliferation of Wi-Fi in India

HOW DOES IT WORK?

RESPONSIBILITY DIVISION IN PROVIDING UNIFIED SOLUTION

PDOA AS A SERVICE

Many Companies have come up with innovative services where they offer:

- Cloud-based PM-WANI Platform
- Multi-tenant Cloud based PDOA as a Service
- PMWANI Certified PDOA and Mobile App
- Wi-Fi and Data Monetization Platform

WHAT DOES IT SOLVE?

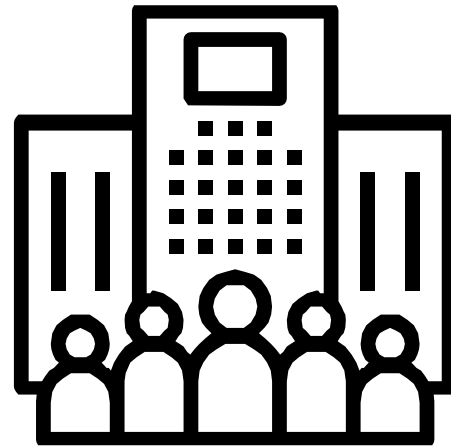

Businesses that **do not have tech capabilities** are able to leverage PM-WANI by adopting this service

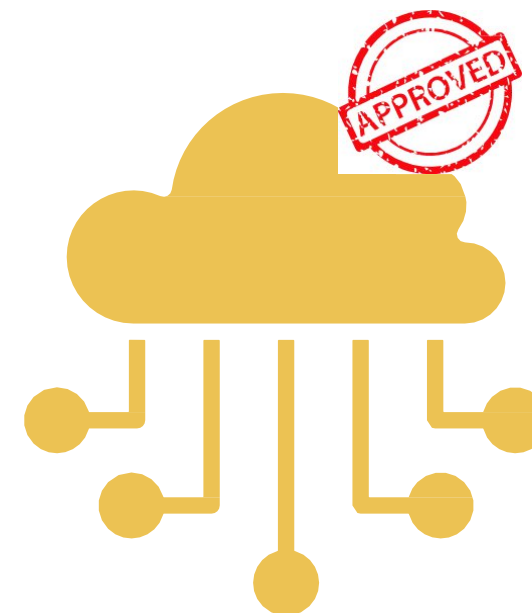

Faster adoption of PM-WANI by businesses who do not have to get in the process for individual certification

HOW DOES IT WORK?

Companies take time and effort to become PDOAs by themselves

A Cloud Based **PM-WANI as a service** that provides:

- A ready PM-WANI Certified and compliant platform.
- Mobile app which is PMWANI certified

HOTSPOT CENTRES

Wi-Fi hotspots have been deployed at multiple railway stations, tourist hotspots, educational institutions, libraries and Govt. Hospitals to offer a seamless wi-fi experience for customers

WHAT DOES IT SOLVE?

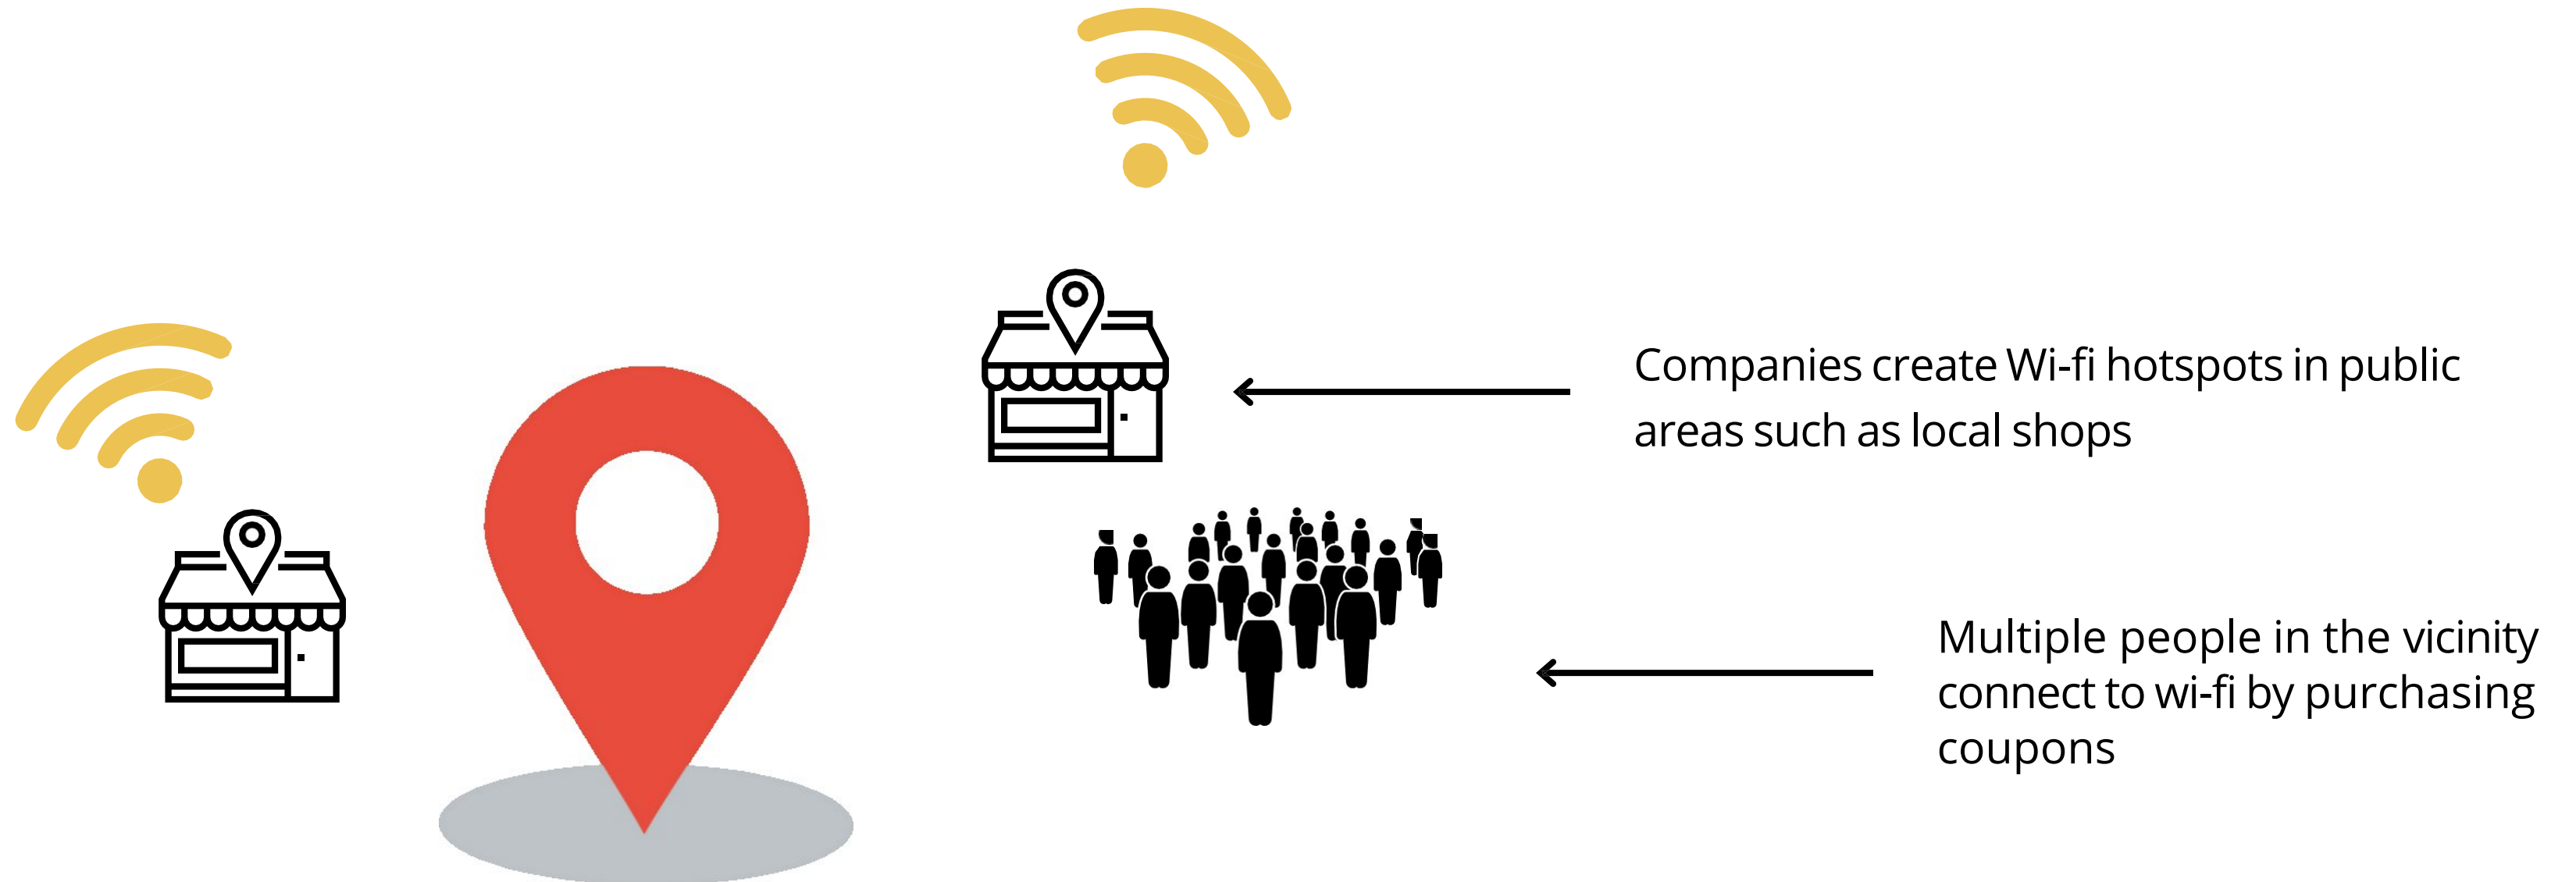

Enhancing **unlimited internet connectivity** in public areas even extending to rural areas

Extra income possibilities for local shop/kirana store owners who further sell wifi as coupons to customers

HOW DOES IT WORK?

FREE PUBLIC WIFI HOTSPOTS

Some companies are ensuring free wi-fi access in famous café chains across the country to enable unlimited high-speed internet even outside your home

WHAT DOES IT SOLVE?

Wi-fi access in public places even outside your home

Network effects for customers as they can connect to unlimited Wi-fi at any PM-WANI compliant hotspot

HOW DOES IT WORK?

- Companies install a PM-WANI compliant routers inside café chains
- Users get authenticated and can use free Wifi
- The Wifi can be used not only in the given area but at all PM-WANI compliant spots creating a string network effect
